

"Caring for the Land and Serving People"

CAMPGROUND HOSTS NEEDED!

The Ochoco National Forest has several fee operated campgrounds that need assistance to maintain and monitor the facilities.

RESPONSIBILITIES:

The primary duties of a Campground Host include ensuring that all campers have submitted payment, maintaining the grounds and facility, and monitoring visitor usage. Specific features that may require maintenance include: toilets, fences, hand pumps, water systems, picnic tables, and fire rings. Additionally the grounds may need vegetation trimming, garbage removal, or various other work projects.

Camp Hosts are the eyes and ears of the forest, so they should communicate regularly with US Forest Service employees. It is essential that the selected Camp Host(s) exhibit good communication skills with the public, have the ability to do minor physical labor, and are willing to assist visitors at odd hours.

Camp Hosts will live on-site in their own accommodations. However, there are no electrical hook-up stations at any of our campgrounds, and only one campground has a septic tank at the host site.

If you are interested in supporting the recreation program on the Ochoco National Forest, or would like more information, please contact Kat Smith (Recreation Crew Leader) at (541) 416-6405.

We'd love to have your help and appreciate any inquiries!
